EDUCATION

University of Toronto — HBSc in Computer Science, Co-op Program (ASIP)

Expected April 2029

- **Relevant Coursework:** Software Engineering, Artificial Intelligence, Algorithm Design/Analysis & Complexity, Operating Systems, Software Design, Data Structures & Algorithms, Probability & Statistics, Computer Organization
 - **Societies & Clubs:** UofTHacks Design Executive, UofT Commuter Student Network Director of Communications, UDesign UX/UI Designer
-

SKILLS

Languages: Python, Java, JavaScript, HTML, CSS, C, Swift, MIPS Assembly, R, LaTeX | English, Brazilian Portuguese

Frameworks & Libraries: SwiftUI, React, React Native, NumPy, Pandas, Pygame, p5.js, Django

Tools & Design: Git/Github, VS Code, Xcode, IntelliJ, Figma, Procreate, Adobe Creative Suite, Excel, Canva

EXPERIENCE

Software Developer Intern

September 2026 – Present

Bellwoods Capital

- Enhanced an existing React Native + Django MVP into a production-ready cross-platform mobile app (iOS & Android) called Thrive: Happy Habits.
- Developed new features such as gamification, push notifications, user-tailored exercises with an in-app AI model, and secure data storage & analytics for psychology research purposes.

UX/UI Designer

September 2026 – Present

UDesign

- Designed digital interfaces for projects or platforms (such as UDesignathon) using various design tools (Figma, Procreate, Blender) that support user-centred thinking.
- Coordinated with developers and designers to prototype and implement website features focused on user experience.

Design Executive

March 2026 – Present

UofTHacks

- Designed UI mockups and graphics viewed by over 700+ hackathon participants across web and social media platforms.
 - Collaborated with a 40+ member cross-functional team across software, product design, and marketing to improve user experience and coordinate design projects.
-

PROJECTS

FairyTale — iOS Storybook App ([GitHub](#))

- Independently developed an iOS storybook application using SwiftUI and SwiftData that enables users to create, customize, and persist interactive stories.
- Designed all illustrations, UI screens, and original audio assets, demonstrating full-stack ownership from concept to deployment.

Trivia — Java Desktop App ([GitHub](#))

- Collaborated with a multi-developer team to build a Java trivia application supporting user-generated questions and API-sourced question banks through Open Trivia DB.
- Implemented persistent state management, question-set serialization, and dynamic UI rendering, while using Git/GitHub pull requests and code reviews to coordinate development.

StarLinks — Python Graph-Based Actor/Movie Connection System ([GitHub](#))

- Built a graph-based actor–movie search engine with an interactive React front end, modeling relationships between actors and films (inspired by The Six Degrees of Kevin Bacon).
- Implemented BFS shortest-path search using adjacency lists with $O(V + E)$ traversal complexity.
